By the way, here's a summary of our last call with him:

-

Hoosick Falls/Petersburgh PFOA

Mark organized a conference call with a Petersburg resident (Bob Gorghan) and a another resident colleague of his to discuss health concerns and response actions related to PFOA releases and contaminated drinking water potentially associated with the Taconics Plastics facility. Health concerns were raised over the likelihood that residents have been chronically exposed to PFOA at levels near of above 100 ppt. Pat explained that the current filtration systems are removing PFOA in drinking water to detection limits (approx. 2 ppt). Referred residents to Dr. Marcus Martinez re: specific questions related to family medical histories and any possible links to PFOA exposure. The residents expressed frustration that NYS DEC/DOH was not paying proper attention to Petersburg as they have been doing with Hoosick Falls. One example noted the need for Petersburg residents having to travel to Hoosick Falls to participate in the PFOA blood monitoring program. The residents also expressed concern about the lack of information and general responsiveness they have been receiving from NYSDEC/DOH related to possible health studies of area residents and the source investigation of contamination even though calls have been made up to the Deputy Commissioner level.
